

With a vision to be the world's largest and most respected software testing company, Cigniti is equipped with precision guided modules that are driven by speed, skill and accuracy.

Renowned for global thought leadership in the industry, Cigniti draws expertise from over a decade of test engineering across verticals.

Testing at Cigniti is defined, measured, optimized and reviewed across all the stages of test life cycle to ensure the development of flawless software products and applications. Our market driven testing approach helps clients identify and eliminate redundancies in costs, infrastructure and processes while ensuring smoother and faster applications.
